

# Web Fundamentals: Teacher Task Flow

Mr. Pryzbylewski teaches Web Fundamentals. He is an experienced teacher in traditional classrooms, but has only administered one previous online course (which used a much different interface than Web Fundamentals). Mr. Pryzbylewski would like to grade newly-submitted assignments, check in on any students who might be struggling with the material, and add a link to an article on CSS that was just published.

First, Mr. Pryzbylewski will check on newly-submitted assignments. After the website log-in recognizes Mr. P as a teacher, additional options are made available. The *Submission* element (which appears on both the *Dashboard* and *Primary Navigation*) includes a pop-up notification of new submissions and can also be used to quickly navigate to the *Grade Book*.
